Election/Restrictions

Claims 1-78 are generic to the following disclosed patentably distinct species:

Claims 1-26, the species is acyl peroxide.

Claims 27-42, the species are phenyl radicals

Claims 43-60, the species is hydroxyl radicals

Claims 61-78, the species is methyl radicals

The species are independent or distinct because the chemical groups functionalizing the carbon nanotubes are distinct. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

During a telephone conversation with Ross Spencer Garsson on June 6, 2006 a provisional election was made without traverse to prosecute the invention of Group II, claims 27-42. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-26 and 43-78 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 1-26 and 43-78 directed to claims non-elected without traverse. Accordingly, claims 1-26 and 43-78 have been cancelled.

The following is an examiner's statement of reasons for allowance: USP 5,547,748 to Ruoff is the closest prior art. Ruoff suggests functionalizing carbon nanoencapsulates with carbenes (see column 8, lines 52-67). However, there is no suggestion to functionalize a carbon nanotube with a phenyl radical and an organic iodide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rebecca M. Stadler whose telephone number is 571-272-5956.
